PROJECTS

Portfolio Website   Oct 2023 - Dec 2023
(Technologies used : Javascript, Next.js, React, TypeScript, Tailwind CSS)

- My portfolio website serves as a dynamic showcase of my skills, accomplishments. Featuring a user-friendly design, the site provides an interactive experience for visitors to explore my diverse projects, ranging from web development and app development.

Socials   Jun 2023 - Aug 2023
(Technologies used : Java, Android, Firebase)

- Java programming was used to create the "Socials" Android chat application, while Firebase was used as the back-end. Users can chat with friends, family, or coworkers through "Socials," promoting fluid connection over distance.

IoT Based Alert System for Disabled Person   2022 - 2023
(Technologies used : (Hardware/Software)

- A technological solution created to improve the security and independence of people with disabilities is an IOT-based alert system for disabled people utilizing Arduino and C++. Aggregating data from various sensors, spotting patterns, and setting off alarms as necessary are all tasks carried out by the central hub.

ACHIEVEMENTS

- September 2, 2023 The Yashwantrao Chavan College of Engineering - YCCE, Nagpur, MH, IN hosted the Android Campus Fest, where I had the privilege of listening to a stellar lineup of speakers and insights today. I registered my social networking application "Socials" for the Appathon as well, and I'm thrilled to share that it was selected for the shortlist and that I was one of the select few participants to win the Appathon.

EXTRACURRICULAR ACTIVITIES
